

Job Description:

We are seeking a skilled Quality Assurance (QA) Engineer with 4 to 6 years of experience to join our team. The ideal candidate should have a strong background in manual testing and familiarity with automation testing, along with excellent communication skills in English.

Key Responsibilities:

- Perform end-to-end manual testing to validate product functionality, performance, and reliability.
- Develop and execute detailed test cases, scenarios, and scripts to identify software defects.
- Collaborate with development and product teams to understand requirements and ensure complete test coverage.
- Design, implement, and maintain automation test scripts to improve testing efficiency (as required).
- Report bugs and follow up on issues to ensure timely resolution.
- Participate in regular team meetings and effectively communicate test progress, results, and issues.
- Contribute to continuous process improvement efforts within the QA team.

Requirements:

- 4 to 6 years in a QA role with hands-on expertise in manual testing.
- Basic understanding or experience in automation testing tools (e.g., Selenium, JUnit, TestNG) is an advantage.
- Strong command of English, with the ability to communicate effectively in both written and verbal formats.
- A keen eye for detail and commitment to delivering high-quality work.
- Ability to work in a collaborative team environment and contribute to continuous quality improvement.

Preferred Skills:

- Experience in Agile/Scrum environments.
- Familiarity with bug tracking tools (e.g., JIRA, Bugzilla).
