VBS TECH PVT LTD, Web Developer	Ghaziabad May 2024 – April 2025
<ul style="list-style-type: none">Specializing in designing and developing responsive user interfaces using HTML, CSS, JavaScript, and Bootstrap.Proficient in creating interactive web experiences, ensuring cross-browser compatibility, and writing clean, maintainable code.Experienced in delivering scalable front-end solutions** tailored to client requirements.Skilled in task management, meeting deadlines, and collaborating effectively within teams.Regularly commits code to drive seamless web application development and enhance user experience.	

Projects

Ayurveda Medicine Web Application

Designed and developed the front end of an Ayurvedic e-commerce platform, enabling users to browse Ayurvedic products, view detailed information, and make seamless purchases. The platform includes an intuitive user interface, product filtering options, and an optimized shopping experience.

- Designed **responsive and visually appealing** product listing and detail pages.
- Implemented **interactive product filtering** to enhance user experience.
- Collaborated with the **backend team** to integrate APIs for **product listings, user authentication, and order management**.
- Ensured **cross-browser compatibility** and optimized performance for various devices.
- Technologies Used:
HTML, CSS, JavaScript, Bootstrap, AJAX (for dynamic content updates).

Portfolio Website

Developed a professional portfolio website to showcase personal projects, skills, and experience as a front-end developer. The website features interactive sections, animations, and a fully responsive design for an engaging user experience.

- Designed and implemented a modern, responsive UI with a clean layout
- Integrated smooth scroll animations and hover effects to enhance the user experience
- Implemented interactive elements to engage visitors effectively.

- Ensured cross-browser compatibility and optimized performance for various devices.
- Technologies Used:
HTML, CSS, JavaScript, Bootstrap, GSAP (for animations).

Real Estate Prop. Dealing System

Designed the front-end of a real estate transaction platform, enabling users to sign up, list properties for sale or rent, and interact with administrators. Key features include property management and chat functionality for inquiries and interest expression.

- Designed intuitive forms for property listings, user registration, and login
- Developed interactive property listing pages with authentication
- Integrated user authentication and property management APIs for seamless functionality
- Worked closely with backend developers to ensure smooth data flow and user experience
- Technologies Used:
HTML, CSS, JavaScript, Bootstrap, jQuery (for user interactions).

Skills

Programming: WordPress , HTML , CSS , Bootstrap , Javascript , Angular
